EXPERIENCE

*Optoro, **Software Engineer***

Nov 2021 - Mar 2025

- Integrated Google Maps API to build features to streamline return logistics across 2,000+ retail locations, improving location accuracy and customer experience.
- Developed Vue.js and Bootstrap prototypes for enterprise clients (Gap, IKEA, LL Bean), collaborating with QA to automate end-to-end testing with Cypress, reducing manual QA time and accelerating releases.
- Reduced deployment time by 67% by building and deploying multiple applications with CI/CD pipelines using GCP's Cloud Build, improving deployment reliability.
- Integrated third-party APIs in Ruby on Rails to process 1M+ daily orders, tagging and logging order data for microservice consumption and ensuring scalability in high-volume environments.
- Built Python and Django scripts to automate error publishing to GCP and Kafka, streamlining data flow and external API integrations.

*Broadcast, **Full-Stack Engineer***

Dec 2020 - Apr 2021

- Built full-stack applications with JavaScript, Node, MongoDB, and SendGrid API, enabling businesses to engage 30K+ customers annually through marketing, promotions, and user-research campaigns.
- Utilized Heroku to deploy React applications, OAuth to authenticate 500+ B2C users, using Stripe API to process 12+ payments per user, facilitating over 1000 transactions every quarter.
- Engineered a network-testing service with Express API and MySQL, leveraging Navigator Object to capture connectivity data for 600+ clients across 3,700+ devices.

*Building Noble Solutions UEP, **Full-Stack Engineer***

Jun 2019 - Sep 2020

- Delivered a Graphical User Interface (GUI) using SQL and Periscope, enabling clients to analyze 16M+ rows of healthcare-provider data, leading to 3+ product iterations.
- Refactored a React and Node application using the MVC pattern to enable asynchronous appointment scheduling, increasing user bookings by 35%.
- Deployed HYPR enterprise authentication solution on GCP and AWS, enabling password-less MFA for 196K+ client devices and improving login speed by 3x.

EDUCATION

Western Governors University

Software Engineering • 2025 - Present

Flatiron School

Full-Stack Development • 2019 - 2019

Hunter College

Linguistics • 2011 - 2014

SKILLS

JavaScript • React • Vue • Node • Java • Ruby on Rails • SQL • PostgreSQL • Docker • Python • Django • JIRA • MongoDB • GCP
